

TERRESTRIALS x Habitat Conservation Bingo

NAME: _____

DATE: _____

Our planet’s wonderful terrestrials all need clean air, clean water, food, and safe space to make their homes and have their babies. What can you do to help living things in your neighborhood? See how many of these activities you can accomplish!

Shut off the water when brushing your teeth or washing dishes.	Plant a tree or other seed.	Make a poster with facts about an endangered species in your area and hang it up where people can learn more.	Research an endangered species and share what you learn with a friend or family member.	Start a fundraiser or make a lemonade stand to raise money for habitat conservation. Ask an adult for help to find the right place to donate your funds!
Go on a litter hike: pick up all the trash you see on your walk!	Write a letter to a local representative encouraging them to work on habitat conservation where you live.	Turn the lights off when you leave a room.	Plant a pollinator garden.	Research invasive species in your area and what you can do to prevent them from causing harm.
Visit or volunteer at a community garden.	Un-plug appliances you aren't using.	FREE SPACE	Share your favorite Terrestrials episode with a fellow nature lover.	Write a story about a plant or animal, the challenges it might face, and how humans can help.
Bring re-usable bags on a shopping trip and use them instead of disposable plastic or paper.	Check out a book about habitats, conservation, or endangered species at your local library.	Start composting: make a small bin or sign up for a service with the help of an adult.	Learn about waste and recycling in your neighborhood – what happens to your trash after you throw it away?	Visit a local park or nature center and learn about wildlife in your area.
Thank a conservationist! Create a thank-you card and send it to someone who helps care for the environment and the animals on our planet.	Visit an aquarium or local education center focused on lakes, ponds, or rivers.	Watch a documentary with a family member about Earth and how humans can help keep it healthy.	Create an art project from recycled materials.	Build a bird nest box or bird feeder, just put peanut butter and bird seed in a pinecone and hang it from a tree!

Ask your parents to share your Terrestrials creations with us at @radiolab using the hashtag #Terrestrialspodcast
